### Ausenco wins Wind Farm project

Ausenco Limited (ASX:AAX) is pleased to announce the award of a contract for German-based, global wind technology company, Enercon.

The contract is for the erection and installation of three wind turbines in the Mt Barker wind farm in Western Australia, a project jointly funded by the community owned Mt Barker Power Company and Advanced Energy Resources.

President of Ausenco Energy, Mr Dwane Stone said the project award, although relatively small, was significant as it signalled the beginning of Ausenco's local entry in the emerging renewable energy market.

"At Ausenco we're traditionally known in the resources sector, but we, together with some high quality partners, have significant expertise and experience in the energy sector," Mr Stone said.

"Our capabilities extend from erection and installation as is the case for this contract, through to the full EPC and operations and maintenance with selected wind turbine generation manufacturers and quality partners.

"We are delighted to be working with Enercon and through them, with the Mt Barker Power Company and Advanced Energy Resources on this important community project."

Mr Stone said Ausenco was also currently in advanced discussions with a number of other parties regarding wind farm developments in Australia and elsewhere in the world.
